

Analysis of ISCB honors reveals disparities

Supplementary materials

Figure S1. Comparison of results across different versions of the analysis. In v1, we only found webpages with full names for keynote speakers for the years 2002-2019. In v2-3, we found earlier records for ISMB, starting from 1993. In v3, we only considered predictions from 2002 on because, before 2002, most authors did not have gender or name origin predictions because of they only have initials for fore names. See our [analysis notebook](#) for further details.

Figure S2. Estimated gender proportion of ISCB Fellows and keynote speakers compared to PubMed authors.
